DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 1, 14, 20, and 22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 14: The claims recite the limitation "said second long edge of each of said at least two panel members of each of said sides being retained along said second end of each of said plurality of corner pieces", and it is unclear whether the second long edge of each of the panels is retained along the second end of the same or another corner piece as the first long edge

Claim 22 recites the limitation "said pole height". There is insufficient antecedent basis for this limitation in the claim.

Claim 20 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 22. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Art Unit: 3635

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Nelsson et al. (3893269).

Regarding claim 1: Nelsson discloses a modular structural assembly comprising: a plurality of sides (panels 32 and 34 between elements 40); each of said plurality of sides including at least two panel members (32 and 34); each of said at least two panel members of each of said plurality of sides having a first long edge and a second long edge;

a plurality of corner pieces (40b as depicted in Figure 6) in matching quantity to said plurality of sides (where Nelsson discloses the panels and corner pieces are arranged to form a circular wall, Col. 3, lines 36-37, and that being the case it is inherent that the number of corner pieces would be in matching quantity to the sides); said plurality of corner pieces each including a first end and a second end (100, 102);

said first long edge of each of said at least two panel members of each of said sides being retained along said first end of each of said plurality of corner pieces; said second long edge of each of said at least two panel members of each of said sides being retained along said second end of each of said plurality of corner pieces;

said plurality of sides and said plurality of corner pieces attached such that a tubular structure is defined (where tubular is defined as "composed of or composing a tube or tubes", and element 40b is a tube as it is a hollow elongated body).

Allowable Subject Matter

Claims 14-22 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claims 2-13 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jessica Laux whose telephone number is 571-272-8228. The examiner can normally be reached on Monday thru Friday, 8:30am to 4:00pm (est).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Naoko Slack can be reached on 571-272-6848. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
